

USTM | Professional water treatment

TAP WATER FILTRATION SYSTEM SILVER

Filtered water flow - 2 l/min

Premium and modern filtration system

Protection of kitchen devices from limescale

Easy and fast cartridge exchange

Tankless and compact

Give up on bottled water

Also available with a mineralizing filter

- L-VITA mineralizing filter has properties such as: restoring the pH balance, replenishing water with microelements, improving the physiological functions of the human body
- L-VITA releases minerals such as: calcium, magnesium, sodium, potassium, iron, zinc, which were removed during water purification in the filtration process RO reverse osmosis system.
- Water is additionally treated with 14 types of trace elements and 15 trace earth elements. The ceramic balls in the L-VITA cartridge are made of natural minerals, which makes them harmless to the human body. L-VITA supports the functioning of the human body's immune system, reduces fatigue and improves well-being.

Symbol	RO SILVER
Type	3-stage water treatment system RO
Filtered water flow	2 l/min
Water flow after osmosis	1,5 l/min
RO dimensions (H x W x L) [cm]	14,5 / 46 / 37,5 cm
I stage of filtration	spun cartridge PS5
II stage of filtration	carbon block BI10
III stage of filtration (optional)	RO membrane
RO membrane	600 GPD
Working pressure	1-4 bar
Working temp.	4-40 °C
Power supply	24/240 V
Power consumption	70 W
Connection	1/2" x 3/8"

Personalized:

with chrome plated
brass faucet

RO SILVER NEW STYLE

with black matt
brass faucet

RO SILVER BLACK STYLE

possible use of
osmotic membrane

TLC SILVER
